

Website Based Project Management

RNA Extranet

RNA Extranet is an online management tool integrated with the current website to support RNA project management and client communications.

This creates a client area on the RNA website and enables customers to login with a user name and password. Files can be shared that have been uploaded specifically for a client.

With build-in file sharing functionality, it is easy to share documents with clients for a project. This allows our clients to exchange files and documents with RNA project members by uploading them onto a safe, fast and reliable online storage area. Upload **photos, drawings, CAD designs, quotations, or reference items**. With this functionality, it removes any potential difficulties of sharing **large files** such as **reference videos** and **high resolution photos**; with the advantage of exchanging information at any time from anywhere.

How To Register RNA Extranet? (Register through Email)

To obtain a username and password for **RNA Extranet**, just send an email to rna@rna-uk.com. You will receive a confirmation email with your login information.

Information you'll need to register

In order to register RNA Extranet, you will need to provide following information through email.

- Your name, contact telephone number, email address
- Your company name and your position

How to share files?

1. Go to RNA **home page**, login using the username and password provided to you via email.
2. On the 'Files' page, click the **Upload a file** button. This will take you to another page that will allow you to specify one or more files to upload. Click the **Browse** button and select a file on your local computer to upload. Then click the **Upload the file** to move the file to RNA extranet (remember, you can upload multiple files). You can also **notify** people by email on this action.
3. Shared Files are listed with icons, names, and descriptions
4. Sort by date/time or from A-Z
5. Group related files by category.

For RNA, we are primarily using the system to manage exchanging files and improve communications with clients. We use the system as a single information repository, primarily for external projects, often with our clients and partners around the world.

This portal becomes a focal point effectively allowing access to RNA projects "24/7" for all of our members and clients.

Any questions and requirements regarding RNA Extranet, please contact Ying Zhang (yingz@rna-uk.com).
